Professional Summary

I am a passionate and skilled Software Programmer with experience in developing web-based applications using Python, Django, HTML, CSS, JavaScript, and SQLite. Adept at problem-solving, automation, and optimizing workflows. Enthusiastic about coding and continuously learning new technologies to enhance software development processes.

Skills

• Programming: Python, Django, HTML, CSS, JavaScript

• Database Management: SQLite

• Software Development: Web-based applications

• Version Control: Git, GitHub

• Problem-Solving & Debugging

• Strong Analytical and Logical Thinking

• Project Management & Team Collaboration

Work Experience

Software Programmer – Addis Ababa Food and Drug Authority (Sep/2024 – Present)

• Developed a web-based call automation system to retrieve and process task values, automate functions using Excel data, and generate reports.

• Designed and completed a web-based attendance recording system, including features like attendance tracking, search functionality, payment type integration, and printable records.

• Worked on a To-Do Task List project, implementing security features, sorting, search, and dynamic task management with real-time updates.

• Integrated APIs and deployed applications using Infinity Free for free hosting.

Projects

• Web-Based Attendance Recording System: Developed a system for tracking employee attendance, managing payment types, and generating reports. Implemented search, sorting, and filtering features with a printable report option.

• To-Do Task List Application: Designed a Django-based task management system with login/logout, priority levels, and AJAX-powered task deletion.

Education

Microlink Technology College – bachelor's degree in computer science (Graduated in 2021)
GPA 3.02

Certifications & Training

• Python & Django Web Development Certification (If applicable)

• Advanced Problem-Solving Techniques (If applicable)

Languages

• English: Proficient

• Amharic: Native

Interests & Hobbies

• Coding & Software Development

• Watching Movies & Listening to Ethiopian Music

• Exploring New Technologies
